Journal Pages

Draw a picture & write 2-4 sentences about your Family Challenge. Ask your family to write in the journal too!

K
i
d *“I take joy in doing
your will, my God,
for your*

W
O
r
d *instructions are
written
on my heart.”*

Psalm 40:8

Kid Answer

*No matter where I fly, God
is always standing by.*

Activity

Number the pictures in the order that they happened in our story today.

Fill in the missing words for our Kid Answer:

No matter where _____ go,
_____ is
_____ there!

How to Build a Kite

1. Lay plastic sheet flat and draw lines on sail to cut. Cut out sail shape and mark locations for bridle attachment.
2. Do art decorating, and place stick on your sail, making a cross. Tape sticks at each end to the sail and wrap tape over tip of stick and onto opposite side of the sail.
3. Prepare 2 bow string tape tabs with toothpick re-enforcements. Tie both sticks together at cross with two wraps of string.
4. Make bridle by cutting string 60" long and attach through sail and around sticks.
5. Make bowstring by cutting a piece of string 30" long. Attach to each end of horizontal stick with tape tab re-enforced with toothpick causing stick to bow. When bowed properly, distance should be approximately 4" from center of string to point where sticks cross.
6. Make bridle adjusting loop by cutting string about 6" long. Tie ends with overhand knot. Place loop onto bridle with larks head knot.
7. Cut 25 feet or more of string and wind onto hobby stick. Attach fly line to bridle loop with 2 overhand knots.
8. Attach bridle loop so kite will hang slightly lower at tail end. the re-adjust to wind speed. make tail with plastic or cloth strips 2" wide and approximately 10" long.

At Home Family Challenge...

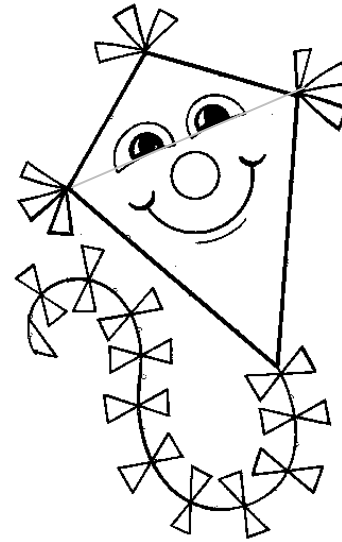

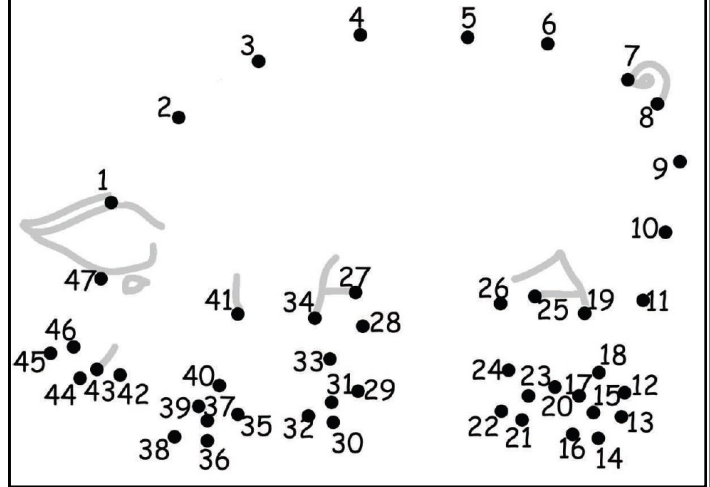

- Go to the local park and fly a kite with family.
- Make your very own kite using the instructions below. Let family help.
- Take a picture of your family at the park or making a kite and share it:
 - e-mail Kidnation@SouthHills.org
 - post it Kid Nations FaceBook
 - bring it with you to church

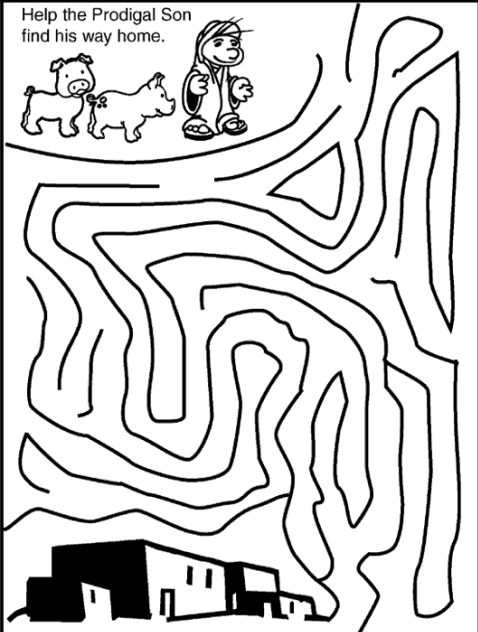

Draw A Kite Below

Page

Connect the dots to see the picture.

How many triangles
can you find on this
kite? _____

Tell us what happened next...

On Sunday I went to the store with
_____ (*add someone's name*) to
buy everything we needed to make a spe-
cial super power kite. We got amazing
looking paper, 2 sticks, string for the tail
and the special super power ingredient
_____ (*name the ingredient*).

When we got home, we began making the
kite. Just about when we were all done, the
biggest gust of wind blew the doors and
windows open! Then next thing we know
the kite ...

(now you help us write the rest of the story...)
